Function with Style

Unique 45° down coverless receptacle bonnet with the eye appeal of die cast and an anodized aluminum extrusion design gives you an architectural feel. These features meet the most demanding outdoor functional and Canadian Code requirements.

Engineered Power with Control

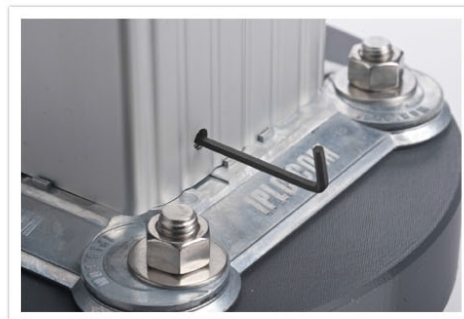

Deliver power with load limits, pre-programmed temperature schedules, and initial power delay, all programmable to your requirements, with the short circuit protection of the IPLC M210 control enclosed in the IP3 Series Pedestal.

Installation Made Easy

Designed to fit with universal mounting technology even if the bolts are out of alignment. The pedestal slides open to allow easy access to all connections for a timely wiring and mounting installation.

Maintenance Friendly

All aluminum “rust free” construction with no visible fasteners, comes installed with maintenance free solid state IPLC control eliminating tripped breakers makes the IP3 Series Pedestal a low maintenance choice for reduced service costs.

Product Code Structure

Typical Product Code

IP3

29

SR

C

DN

Series Type

Enclosure Height in Inches

15 - 15" High

29 - 29" High

Number of Receptacles

SR - Single

DR - Dual

IPLC Control

C - Control

N - No control

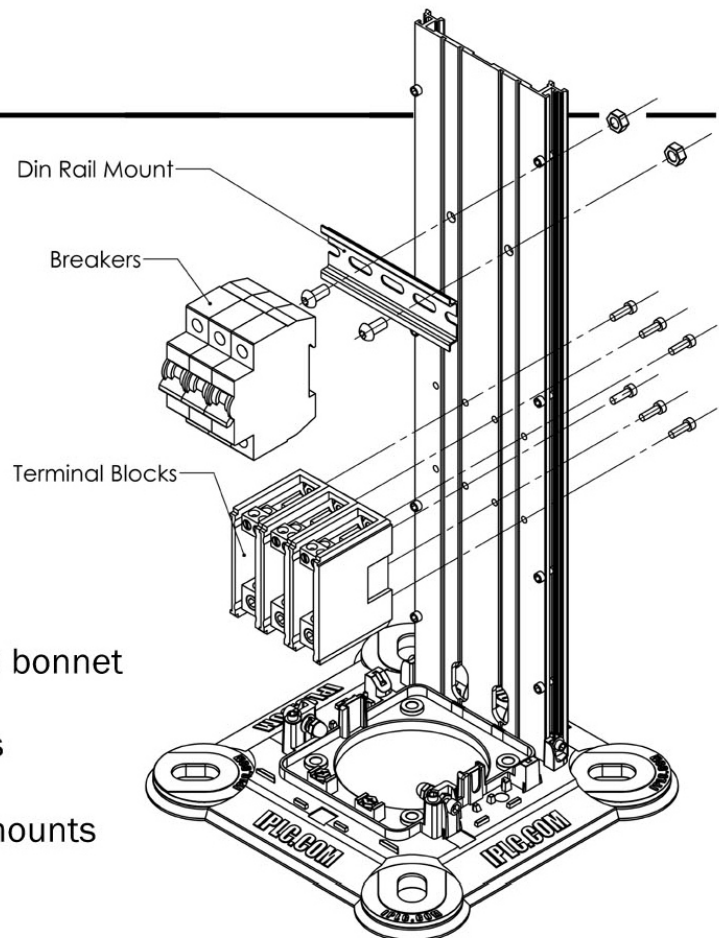

Receptacle Mount

DN - 45° down mount

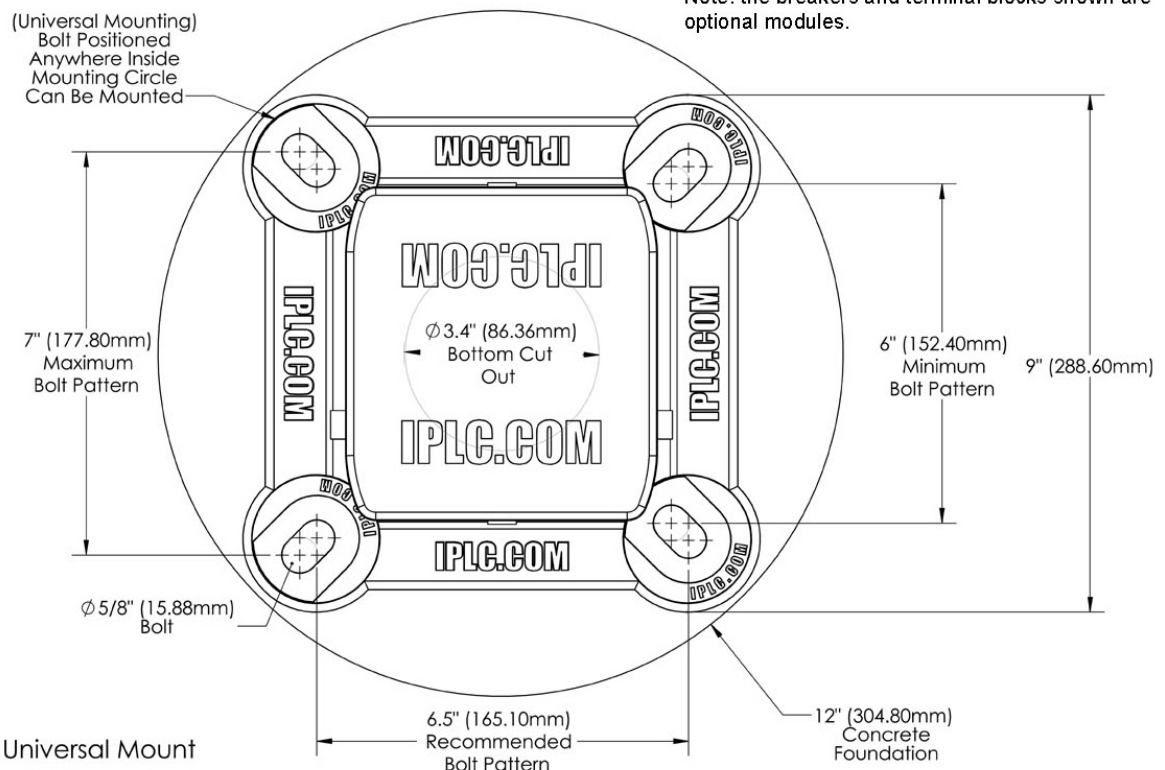

FS - Box mount (requires approved in use cover wet locations)

Key Features

- Integrated IPLC M210 Control
- Meets new electrical codes
- CSA approved electrical enclosure (type 3R)
- 45° down coverless receptacle bonnet
- Standard 15" and 29" heights
- Fits standard 6" and 7" grid mounts
- Single or dual control models

Note: the breakers and terminal blocks shown are optional modules.
